Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to the paper(s) filed 4/25/05.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 7, there is no antecedent basis for the script command.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1, 2, 4-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Holtz et al (US6760916). Holtz et al teaches [fig 11, abstract] a media player on a client machine that enables a user to build custom playlists for content to be streamed to the user. The client renders the stream as well as simultaneously renders/displays other content such as HTML content/window 1108a, banner 1114a, browser content 1112,

etc. Holtz et al teaches that enhancements to the streaming content can include ads such as banners, sponsorships, scrolling element and buttons/links [34:27-31, 46-50]. The ads can be linked to each content segment requested so the user can view such ads when also viewing the streaming content [4:5-19]. The streaming content includes a metafile (playlist) script that defines commands for including particular filesstreams as well as advertising, text, graphic elements and hyperlinks associated with the video and topic being streamed which are linked to each content segment [8:60 to 9:20]. The ads can be integrated into the media stream at any point [9:51-53]. The ads come from remote databases/sources. The ads can be programmed to run before, during or after each streaming segment content [34:32-39]. The ads can be shown in the same vcontnet frame or in other frames [35:5-12]. Holtz et al teaches HTML banner ad sponsorship 1114b that is shown simultaneously with the particular requested content segment [37:26-34]. Holtz et al also teaches informative supporting media that is linked to run simultaneously with the streaming content [38:35-56, 39:10-17, 40:54 to 41:10, 41:35-54, 43:51-64, 44:2-8]. This content could also be considered to be "advertising." The client application of Holtz et al is taken to be a browser with various frame sets that contain the disclosed content and is capable of browsing the web, displaying HTML content and enabling hyperlinks. Holtz et al is taken to inherently include directory construction and searching for files which define the parameters of the frames in order to properly render the frames as well as the content that is rendered within them. Holtz et al teaches logging when the ads are played [abstract, 4:48-50].

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Dwek (US6248946) also teaches a client application that can play user-requested streaming content as well as simultaneously display auxiliary content including advertising in a separate frame..
